

Boomwhacker Workshop Team Activity

Boomwhackers are brightly coloured tubes that are tuned to musical notes and are played by 'whacking' the ground or other solid surface. They are easy to use and lots of fun. Boomwhackers make fantastic instruments for percussion workshops; combining percussion, rhythm, music and movement. A different style of corporate drumming workshop providing a truly memorable corporate team building activity.

Boomwhackers provide a great example of what groups can achieve in concert! With them, we can create a melody, find a rhythm and cultivate an ear to hear things in a different way. Somewhere in sound between a muted xylophone and a marimba, Boomwhackers are subtle, versatile, colourful and exciting.
